STUDENTS CHARTER SPECIAL TRAIN

At the close of the six week winter course, students in the regular and courses of the University School of Agriculture chartered a special train for South Omaha, where they were the guests of the pecking houses and the Union Stock Yards Co.

BIG PROFIT IN DRILLING WHEAT

With wheat worth \$1.50 a bushel, the farmer in central and western Nebraska would receive \$1.10 an acre more by drilling it than broadcast it according to experimental data from the North Platte substation.

PAYS TO ROLL WHEAT

In view of the fact that the Nebraska experiment station has found that rolling wheat increases the yield over five bushels an acre when roots are exposed thru surface cracking, farmers are considering this a profitable practice this spring.

The county agricultural agents have found out little difference in yield where spring rains have been regular and timely enough to pack the soil and prevent checking.

A daily paper for \$2 when the regular price is \$3. That's a special offer made only now by the Lincoln Daily News. In fact, they will mail the paper from now until April 1, 1916, for only \$2. This gives you all the important work of the legislature; will give you the most complete war news with all the excitement of battles and if a settlement comes before the year is out, the arrangements of peace will be a most absorbing subject.

SCHOOL NOTES.

The program given by the boys of the high school last Saturday evening was well attended. The lads all appreciated the support given them and thank all who were present. If you failed to hear her you have missed a treat, for with Miss Walsh there is no affection or put on, she is naturally a reader.
